## **DETAILED ACTION**

Page 2

## Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to a holding device, classified in class 224, subclass 674.
- II. Claim 19, drawn to a method of using a holding device, classified in class 221,subclass 1.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the product can be used in another and materially different method of use. For example, the holding device of claims 1-18 could be used to hold and dispense elongated objects such as writing instruments, wires, a belt or strip of material, nails, etc. as opposed to claim 19 which requires insertion and dispensing of wire ties.
- Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
- 4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
